

BOB-R OM 100x2

Universal rectoscope

- 1 HALOGEN LIGHT SOURCE
- 2 UNIVERSAL HEAD
- 3 FIBER OPTIC LIGHT GUIDE
- 4 HAND AIR PUMP
- 5 SINGLE USE ENDOSCOPES
- 6, 7 REUSABLE TUBES

High quality and functionality of the device were awarded gold medal at SALMED fair

➤ APPLICATION

BOB - R/OM universal rectoscope set is a medical device used for examination, diagnosis and treatment of anus, rectum and sigmoid colon diseases.

➤ DESCRIPTION

The universal head (2) with a grip and hand air pump (4) is attached by means of a fibre optic light guide (3) to the BOB OM 100x2 halogen light source (1), which has two independent light paths, eliminating the risk of failure during an operation.

Single use and reusable tubes may be used with the head which has 2x magnifying lens, allowing for a better observation. We supply different types of single use medical tubes for various applications produced by renowned manufacturers.

Additionally, easy to disinfect, stainless steel reusable tubes are available, in the following dimensions: (6) 30cm long and 20 mm wide, as well 8 cm long and 20mm wide (7). The optic fibre (3) at least 175 cm long may end with many optional tips, fitting all types of heads.

Efficient and quiet cooling of the light source, as well as stepless regulation of the intensity of illumination increases comfort of use

➤ TECHNICAL DATA

Light bulb power 100W/12V	Color temperature halogen 3200 oK	Period of incandescence 1000 h
Dimensions BOB OM 100x2	LKxWxH 235x115x255	Weight 3,8 kg.
Power supply 230V 50Hz		

Mechanical regulation of illumination intensity withing the range of 0-100%
